

## Benefits

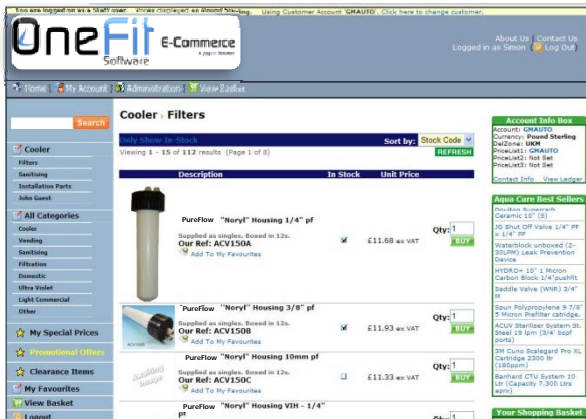

- Expanded Geographical Reach
- Expanded Customer Base
- Available 24/7 – Never Close
- Build Customer Loyalty
- Reduction of Marketing and Advertising Costs
- Collection of Customer Data
- Rapid access to background information

## ECOMMERCE

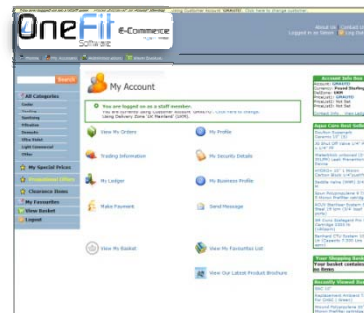

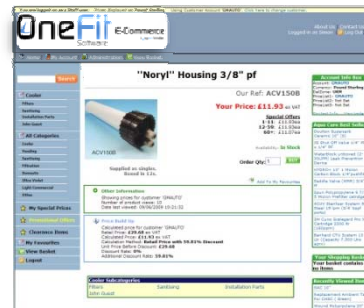

OneFit E-Commerce module is designed to run independently, or as part of an integrated system. It can be supplied for B2B, B2C, or a mix of customer types and as a minimum is supported by an internal manageable product file.

By integrating with your back office systems, this negates the need to maintain supporting data on internal and external systems; and allows order placed within the web portal to be submitted within your internal order processing system.

## Facilities

- Multi-Currency facility
- Can be used as an internal sales tool
- Products are arranged in categories and sub-categories for easy navigation
- Carriage calculation via weight or order value
- Multiple delivery zone and carriage premium options
- Handles cash or credit type orders
- Access to previous orders
- Repeat orders for customer convenience

## Benefits

- Expanded Geographical Reach
- Expanded Customer Base
- Available 24/7 – Never Close
- Build Customer Loyalty
- Reduction of Marketing and Advertising Costs
- Collection of Customer Data
- Share master data
